CLEAN JOBS
COLLABORATIVE

Choose Rochester for manufacturing products for clean energy and tap into unique resources and innovation

Looking for a prime location for manufacturing? The Clean Jobs Collaborative can help. We're building a strong manufacturing base for clean energy manufacturing in Rochester, New York, by removing the barriers that businesses commonly face when exploring optimal sites for new facilities and creating more competitive advantages.

With Rochester at the forefront of the clean energy transformation, our city offers companies a multitude of benefits.

- **Strategic Locations:** Select from a wide range of industrial properties that are supported by advanced infrastructure and close proximity to transportation networks.
- **Skilled Talent:** Access a pipeline of degree- and non-degree professionals and technicians that are skilled in clean energy technologies. Partner with educational and training organizations, and labor unions, to design programs that solve specific skill gaps.
- **Roll-to-Roll Capabilities:** Take advantage of world class expertise and available equipment.

- **Support and Resources:** Connect with technical assistance, location scouting, and workforce development resources tailored to your needs.
- **Sustainable Practices:** Strengthen your business by leveraging best practices or taking the first steps in integrating sustainability with resources such as RIT's Golisano Institute of Sustainability and the New York State Pollution Prevention Institute.
- **Clean Energy:** Explore the latest in solar, wind, hydrogen, hydro, and battery and energy storage technologies under testing, development, and offered by utilities in the region for business use.
- **Community Engagement:** Fast track your presence through an outreach network designed to connect new employers with community organizations, childcare centers, and other vital resources.

ABOUT THE CLEAN JOBS COLLABORATIVE

The Clean Jobs Collaborative is dedicated to making Rochester one of the top manufacturing hubs in the U.S. for products related to clean energy. The initiative, which is administered by NextCorps Growth Services with support from Greater Rochester Enterprise and a U.S Department of Energy MAKE IT Prize, brings more than 20 organizations together to build out five key areas essential to satisfying manufacturing needs: Attraction, Infrastructure (facilities, utilities, and clean energy sources beyond the grid), Workforce Development, Community Interaction and Impact, and Sustainability.

HELP SHAPE THE FUTURE
